Multiple Indicator Cluster Survey 2014

Key Findings Report

December, 2015*

^{*} Report was endorsed by MICS Steering Committee, Punjab in December, 2015 and disseminated in March, 2016

The Multiple Indicator Cluster Survey (MICS) Punjab, 2014 [Pakistan] was carried out during 2014 by Bureau of Statistics Punjab in collaboration with United Nations Children's Fund (UNICEF). It was conducted as part of the 5th global round of MICS. Major funding was provided by Government of the Punjab through Annual Development Programme 2014-15 and the technical support was provided by the UNICEF.

The global MICS programme was developed by UNICEF in the 1990s as an international household survey programme to collect internationally comparable data on a wide range of indicators on the situation of children and women. MICS surveys measure key indicators that allow countries to generate data for use in policies and programmes, and to monitor progress towards the Millennium Development Goals (MDGs) and other internationally agreed upon commitments. MICS is flexible to adjust country specific indicators to meet planning needs such as in MICS Punjab, 2014 data on 'income & employment', 'workers', 'remittances', 'safety nets', etc was also collected.

The major objective of this report is to facilitate the data users to review the MICS Punjab, 2014 results swiftly. For more information on indicators and the analysis conducted in the main final report please go to bos.gop.pk, pndpunjab.gov.pk and mics.unicef.org

Executive Summary

The survey was planned, designed and implemented by Bureau of Statistics (BoS), Punjab. The sample design was provided by Pakistan Bureau of Statistics (PBS). Technical support was obtained from UNICEF Regional office for South Asia (ROSA) and global desk on MICS5. Fieldwork was carried out from June to September 2014.

MICS Punjab, 2014 provides representative household survey estimates of around 125 indicators visa-vis province, area of residence (urban and rural), 9 divisions and 36 districts. Results are also categorized with respect to gender, background characteristics of households and wealth quintiles. In some cases age group distribution is also given including the situation of mother and child in the province. Findings reveal the significant variations in most of the indicators with respect to these characteristics. Major findings of the survey are summarized below:-

Infant and Under-five Child Mortality

Under-five & Infant child mortality rates calculated by indirect method are estimated at 93 and 75 per 1,000 live births respectively.

Nutritional Status

Thirty-four percent of children under 5 are moderately or severely underweight, 33 percent are moderately or severely stunted (i.e. too short for their age) and 18 percent are moderately or severely wasted (i.e. too thin for their height).

Breastfeeding

Ninety-four percent of the children are ever breastfed. Early initiation of the breastfeeding is only 11 percent. Seventeen percent children aged 0–5 months are exclusively while 48 percent are predominately breastfed. Sixty-six percent of the children aged 12-15 months are continuously breastfed at 1 year while 35 percent of children aged 20-23 months are continuously breastfed at 2 years. Sixty-one percent of the infants 6-8 months are introduced to solid semi-solid and soft food.

Vitamin A Supplements

In the 6 months preceding the survey, 65 percent of children age 6–59 months receives a high dose Vitamin A supplement.

Diarrhoea /ARI/ Fever and their Treatment

Seventeen percent of children under 5 have diarrhoea in the 2 weeks preceding the survey. Out of them 49 percent of the children are given Oral Rehydration Therapy (ORT) whereas 39 percent are treated by way of ORT with continued feeding. About 2.5 percent of the children have symptoms of ARI in the last two weeks preceding the survey, 77 percent of them are taken to the health facility or provider, and 39 percent of children who had symptoms of ARI are given antibiotics. Twenty-one percent are found to have an episode of fever out of which 79 percent are taken to the health facility or provider.

Water and Sanitation

Out of the total population 94 percent is using improved sources of drinking water, 81 percent have an access at their premises, 8.4 percent within the travelling time of half an hour and 5.2 percent at more than half an hour.

Improved sources of drinking water are motorized pump (42%), hand pump (31%), piped water (19%) and other sources (2%).

Seventy five percent of the population (urban 92%; rural 67%) are using improved sanitation facilities. Most commonly used facilities are flush toilets connected to septic tanks (44%) and sewerage systems (21%). The population using improved sanitation facility which is not shared by the households is 66 percent.

Fertility

Total Fertility Rate (TFR) is estimated at 3.5 children per woman age 15-49 years, slightly higher in rural areas 3.7 compared to urban 3.0.

Contraception and Unmet Need

Out of the total currently married women age 15-49 years, 39 percent are presently using (or whose husband is using) a contraceptive method. Whereas the unmet need for contraception is 17 percent.

Antenatal Care and Assistance at Delivery

Out of the total women with a live birth in the last two years, 79 percent receive antenatal care at least once during their pregnancy from a skilled personal (a medical doctor, nurse, midwife or Lady Health Visitor (LHV)), 3 percent from unskilled providers whereas 17 percent have no antenatal care. Further, 48 percent of the women have four or more antenatal care visits and 45 percent of the women have their Blood pressure measured, urine and blood sample taken during their antenatal care visits.

Sixty-five percent of deliveries are attended by skilled personal. Sixty-one percent of the deliveries are delivered in a health facility: 43 percent in private and 18 percent in public health facility. Thirty-three percent of all deliveries (rural 40%, urban 19%) are attended by Traditional Birth Attendants (TBAs). Eighty-six percent of the mothers have the postnatal check-up.

Birth Registration

Births of 73 percent of children under 5 years of age are reported registered.

Child Labour

Sixteen percent of the children age 5–17 years are involved in child labour (male 20%, female 12%), 20 percent in rural and 7.6 percent in urban.

Early Marriage and Attitude towards Domestic Violence

About 5.2 percent of the women age 15-49 years got married before 15 years of age, whereas 21 percent of the women age 20-49 years got married before age 18.

About 2.5 percent of the women age 15-49 years are in polygynous marriage. The husbands of the 19 percent of the currently married women age 15-19 years are 10 years or older from them. The husbands of the 15 percent of currently married women age 20-24 years are 10 years or older from them.

Forty percent of women age 15-49 years believe that a husband is justified in hitting or beating his wife for any one of five reasons that she; (i) goes out without telling him, (ii) neglects the children, (iii) argues with him, (iv) refuses sex with him, and (v) burns the food.

Prevalence of Cough, Tuberculosis and Hepatitis

Proportion of household members with cough that lasted for the past 3 weeks is 3.2 percent. The diagnosed tuberculosis and hepatitis among household members during last one year is reported at 0.5 percent and 1.5 percent respectively.

Ownership of Assets

Eighty-seven percent of the population own a house, 30 percent agricultural land and 45 percent livestock. Ownership of agricultural land and livestock is higher amongst the rural population.

REPRODUCTIVE HEALTH

CONTR	CONTRACEPTION AND UNMET NEED			
Indic	ator#	Indicator	Description	Value
MICS	MDG	ilidicatoi	Description	value
-		Total fertility rate	Total fertility rate ^A for women age 15-49 years	3.5
5.1	5.4	Adolescent birth rate	Age-specific fertility rate ^A for women age 15-19 years	34.0
5.2		Early childbearing	Percentage of women age 20-24 years who had at least one live birth before age 18	11.8
5.3	5.3	Contraceptive prevalence rate	Percentage of women age 15-49 years currently married who are using (or whose partner is using) a (modern or traditional) contraceptive method	38.7
5.4	5.6	Unmet need	Percentage of women age 15-49 years who are currently married who are fecund and want to space their births or limit the number of children they have and who are not currently using contraception	17.5

^A The age-specific fertility rate is defined as the number of live births to women in a specific age group during a specified period, divided by the average number of women in that age group during the same period, expressed per 1,000 women. The age-specific fertility rate for women age 15-19 years is also termed as the adolescent birth rate.

The total fertility rate (TFR) is calculated by summing the age-specific fertility rates calculated for each of the 5-year age groups of women, from age 15 through to age 49. The TFR denotes the average number of children to which a woman will have given birth by the end of her reproductive years (by age 50) if current fertility rates prevailed.

6.6		Availability of playthings	Percentage of children under age 5 who play with two or more types of playthings	52.5	
6.7		Inadequate care	Percentage of children under age 5 left alone or in the care of another child younger than 10 years of age for more than one hour at least once in the last week	6.8	
6.8		Early child development index	Percentage of children age 36-59 months who are developmentally on track in at least three of the following four domains: literacy-numeracy, physical, social-emotional, and learning	67.2	

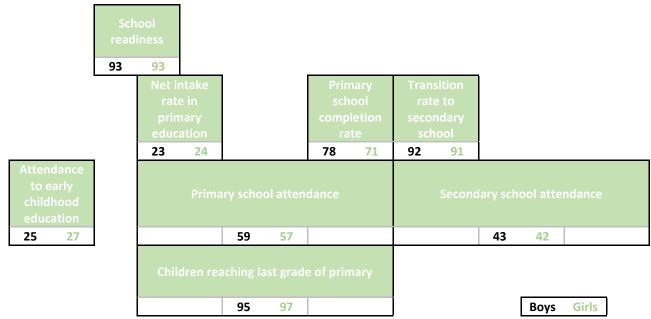

LITERACY AND EDUCATION

		EDUCATION ^{ix}		
Indic	cator #	Indicator	Description	Value
MICS	MDG	maicator	Description	Value
7.1	2.3	Literacy rate among young people	Percentage of young women age 15-24 years who are able to read a short simple statement about everyday life or who attended secondary or higher education	72.6
7.S1		Literacy rate 10+ (Reported)	Percentage of household members age 10 years or older where it is reported that they are able to both read & write with understanding in any language excluding quranic reading, if this was the only response	60.8
7.S2		Literacy rate 15+ (Reported)	Percentage of household members age 15 years or older where it is reported that they are able to both read & write with understanding in any language excluding quranic reading, if this was the only response	58.0
7.S3		Literacy rate 15-24 Years (Reported)	Percentage of household members age 15-24 years where it is reported that they are able to both read & write with understanding in any language excluding quranic reading, if this was the only response	75.9
7.2		School readiness	Percentage of children in first grade of primary school who attended preschool during the previous school year	92.5
7.3		Net intake rate in primary education	Percentage of children of school-entry age who enter the first grade of primary school	23.4
7.4	2.1	Primary school net attendance ratio (adjusted)	Percentage of children of primary school age currently attending primary or secondary school	57.9
7.S4		Primary school gross attendance ratio (adjusted)	Percentage of children of all age currently attending primary or secondary school	86.1
7.5		Secondary school net attendance ratio (adjusted)	Percentage of children of secondary school age currently attending secondary school or higher	42.1
7.6	2.2	Children reaching last grade of primary	Percentage of children entering the first grade of primary school who eventually reach last grade	95.8
7.7		Primary completion rate	Number of children attending the last grade of primary school (excluding repeaters) divided by number of children of primary school completion age (age appropriate to final grade of primary school)	74.9
7.8		Transition rate to secondary school	Number of children attending the last grade of primary school during the previous school year who are in the first grade of secondary school during the current school year divided by number of children attending the last grade of primary school during the previous school year	91.4
7.9	3.1	Gender parity index (primary school)	Primary school net attendance ratio (adjusted) for girls divided by primary school net attendance ratio (adjusted) for boys	0.97
7.10	3.1	Gender parity index (secondary school)	Secondary school net attendance ratio (adjusted) for girls divided by secondary school net attendance ratio (adjusted) for boys	0.98
7.S5		Government school attendance rate (primary)	Percentage of children aged 5-9 years attending Government primary schools	54.2

Note: All indicator values are in percent

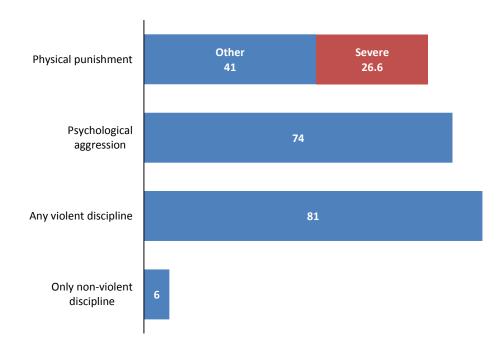

CHILD PROTECTION

BIRTH REGISTRATION					
Indicator #		Indicator	Description	Value	
MICS	MDG	mulcator	Description	value	
8.1		Birth registration	Percentage of children under age 5 whose births are	72.7	
			reported registered		

CHILD	CHILD LABOUR					
Indic	ator#	Indicator	Description	Value		
MICS	MDG	illuicatoi	Description	value		
8.2		Child labour	Percentage of children age 5-17 years who are involved in child labour ^x	16.4		

CHILD	CHILD DISCIPLINE				
Indicator # Indicator Do		Indicator	Description	Value	
MICS	MDG	mulcator	Description	value	
8.3		Violent discipline	Percentage of children age 1-14 years who experienced	80.7	
			psychological aggression or physical punishment during the		
			last one month		

Figure 8: Child disciplining methods, children age 1-14 years, MICS Punjab, 2014

EARLY	EARLY MARRIAGE				
Indicator #		Indicator Description	Description	Value	
MICS	MDG	illuicatoi	Description	value	
8.4		Marriage before age 15	Percentage of women age 15-49 years who were first married before age 15	5.2	
8.5		Marriage before age 18	Percentage of women age 20-49 years who were first married before age 18	20.8	
8.6		Women age 15-19 years currently married	Percentage of women age 15-19 years who are married	9.2	
8.7		Polygyny	Percentage of women age 15-49 years who are in a polygynous marriage	2.5	
8.8a		Spousal age difference	Percentage of young women who are married and whose		
8.8b			spouse is 10 or more years older,		
			(a) among women age 15-19 years,	18.8	
			(b) among women age 20-24 years	14.6	

ATTITU	ATTITUDES TOWARDS DOMESTIC VIOLENCE					
Indicator #		Indicator	Description	Value		
MICS	MDG	ilidicatoi	Description	value		
8.12		Attitudes towards domestic violence	Percentage of women age 15-49 years who state that a husband is justified in hitting or beating his wife in at least one of the following circumstances: (1) she goes out without telling him, (2) she neglects the children, (3) she argues with him, (4) she refuses sex with him, (5) she burns the food	39.8		

CHILDI	CHILDREN'S LIVING ARRANGEMENTS					
Indic	ator#	Indicator	Description	Value		
MICS	MDG	ndicator	Description	value		
8.13		Children's living	Percentage of children age 0-17 years living with neither	1.4		
		arrangements	biological parent			
8.14		Prevalence of children with	Percentage of children age 0-17 years with one or both	4.8		
		one or both parents dead	biological parents dead			
8.15		Children with at least one	Percentage of children 0-17 years with at least one	3.9		
		parent living abroad	biological parent living abroad			

HIV/AIDS

HIV/A	HIV/AIDS KNOWLEDGE AND ATTITUDES				
Indicator #		Indicator	Description	Value	
MICS	MDG		333		
-		Have heard of AIDS	Percentage of ever-married women age 15-49 years who have heard of AIDS	39.0	
9.S1		Knowledge about HIV prevention among young women	Percentage of ever-married young women age 15-24 years who correctly identify ways of preventing the sexual transmission of HIV ^{xi} , and who reject major misconceptions about HIV transmission ^{xii}	3.3	
9.52		Knowledge of mother-to- child transmission of HIV	Percentage of ever-married women age 15-49 years who correctly identify all three means ^{xiii} of mother-to-child transmission of HIV	23.6	
9.S3		Accepting attitudes towards people living with HIV	Percentage of ever-married women age 15-49 years expressing accepting attitudes on all four questions toward people living with HIV	19.0	

HIVT	HIV TESTING				
Indic	ator #	Indicator	Description	Value	
9.54		Women who know where to be tested for HIV	Percentage of ever-married women age 15-49 years who state knowledge of a place to be tested for HIV	8.5	
9.S5		Women who have been tested for HIV and know the results	Percentage of ever-married women age 15-49 years who have been tested for HIV in the last 12 months and who know their results	0.6	
9.57		HIV counselling during antenatal care	Percentage of ever-married women age 15-49 years who had a live birth in the last 2 years and received antenatal care during the pregnancy of their most recent birth, reporting that they received counselling on HIV during antenatal care	1.3	
9.58		HIV testing during antenatal care	Percentage of ever-married women age 15-49 years who had a live birth in the last 2 years and received antenatal care during the pregnancy of their most recent birth, reporting that they were offered and accepted an HIV test during antenatal care and received their results	1.1	

Orphans					
Indicator #		Indicator	Description		
MICS	MDG	mulcator	Description	Value	
9.16	6.4	Ratio of school attendance of orphans to school attendance of non-orphans	Proportion attending school among children age 10-14 years who have lost both parents divided by proportion attending school among children age 10-14 years whose parents are alive and who are living with one or both parents	(0.83)*	
*Indicator de	*Indicator denominator based on 25-49 unweighted cases - Indicator value is shown here but not in respective chapter of final report.				

ACCESS TO MASS MEDIA AND ICT

ACCESS TO MASS MEDIA					
Indic	Indicator # Description		Value		
MICS	MDG	illuicatoi	Description	value	
10.1		Exposure to mass media	Percentage of women age 15-49 years who, at least once a	1.3	
			week, read a newspaper or magazine, listen to the radio,		
			and watch television		

USE OF	Use of information/communication technology				
Indicator #		Indicator	Description	Value	
MICS	MDG	mulcator	Description	value	
10.2		Use of computers	Percentage of women age 15-24 years who used a computer during the last 12 months	21.4	
10.3		Use of internet	Percentage of women age 15-24 years who used the internet during the last 12 months	12.4	

SUBJECTIVE WELL-BEING

SUBJE	Subjective well-being					
Indic	ator#	Indicator	Description	Value		
MICS	MDG	indicator		value		
11.1		Life satisfaction	Percentage of young women age 15-24 years who are very or somewhat satisfied with their life, overall	90.5		
11.2		Happiness	Percentage of young women age 15-24 years who are very or somewhat happy	90.9		
11.3		Perception of a better life	Percentage of young women age 15-24 years whose life improved during the last one year, and who expect that their life will be better after one year	59.2		

TOBACCO USE

TOBACCO USE					
Indicator #		Indicator	Description	Value	
MICS	MDG	maicator	Description:	value	
12.1		Tobacco use	Percentage of women age 15-49 years who smoked	4.1	
			cigarettes, or used smoked or smokeless tobacco products		
			at any time during the last one month		
12.2		Smoking before age 15	Percentage of women age 15-49 years who smoked a	0.2	
			whole cigarette before age 15		

HOUSEHOLD CHARACTERISTICS²

ADULT	ADULT HEALTH AND HEALTH CARE				
Indicator #		Indicator	Description	Value	
MICS	MDG	ilidicatoi	Description	value	
13.S1		Care provided by Lady	Number of women aged 15–49 years who have given birth	37.6	
		Health Worker (LHW)	in the previous 2 years and were visited by a Lady Health		
			Worker (LHW) in the last month		
13.S2		Prevalence of chronic	Number of household members with cough that lasted for	3.2	
		cough	the past 3 weeks		
13.S3		Reported tuberculosis	Number of household members that were diagnosed with	0.5	
			tuberculosis in the past year		
13.S4		Reported hepatitis	Number of household members that were diagnosed with	1.5	
			hepatitis in the past year		

Assets				
Indicator #		Indicator	Description	Value
MICS	MDG	ilidicatoi	Description	value
14.S1		Ownership of assets:	Percentage of household members living in a household	
		House, land, livestock	that own a house, land or livestock	
			a) House	87.0
			b) Agriculture land	30.5
			c) Livestock	45.5

UNEMPLOYMENT				
Indicator #		Indicator	Description	Value
MICS	MDG	illuicatoi	Description	value
14.S2		Unemployment rate (10+	Percent of household members aged 10 years or older who	7.1
		years)	are unemployed and are seeking jobs	

Housing				
Indicator #		Indicator	Description	Value
MICS	MDG	indicator	Description	value
14.S10		Mean household size	Average members in a household	6.4
14.S11		Currently married population	Percentage of household members of age 10 years and above currently married	51.4
14.S12		Mean number of persons per room	Average members sleeping in one room	3.9
14.S13a		Household characteristics	Main material of floor, roof and wall	
14.S13b			a) finished floor (pacca)	63.4
14.S13c			b) finished roof (pacca)	82.2
			c) finished wall (pacca)]	86.6

-

 $^{^2}$ Indicators related to Household Charachterstics are specific to the Punjab Survey and a part of the global MICS

REMIT	REMITTANCES AND ZAKAT				
Indicator #		Indicator	Description	Value	
MICS	MDG	marcator	2000.1911011	3.10.0	
14.53		Proportion of population working outside village/town/abroad	Percentage of family members working outside village/town/abroad	12.0	
14.S4		Receiving remittances from Pakistan	Percentage of household members who received remittances from Pakistan during the year preceding the survey	3.1	
14.S5		Receiving remittances from abroad	Percentage of household members living in a household that received remittances from abroad during the year preceding the survey	7.3	
14.S6		Receiving cash donation	Percentage of household members living in a household that received cash donation such as zakat or other means during the year preceding the survey	1.2	

SOCIA	Social benefits & Subsidies				
Indicator #		Indicator	Description	Value	
MICS	MDG	illuicatoi	Description	Taluc	
14.57		Safety nets (Getting benefits from government schemes of social protection)	Percentage of household members living in a household that got benefits from government schemes of social protection [Benefits include: zakat, dearness allowance, health subsidy, education subsidy, marriage grant, subsidized food, others]	7.2	
14.S8a		Purchasing goods from government utility stores	Percentage of household members living in a household that purchase goods from government utility stores	18.0	
14.S8b		Regular purchase from utility stores	Percentage of household members who purchase goods from government utility stores regularly	29.5	
14.S9		Receiving pensions	Percentage of household who received pension during the year preceding the survey	8.1	

NOTES

Following modules of "Individual questionnaiore for women" were asked only from ever married women of age 15-49 years:

- Fertility
- Desire for Last Birth
- Maternal and Newborn Health
- Post-natal Health Checks
- Contraception
- Unmet Need
- HIV/AIDS
- "Weight and height/length measurements were successfully completed for 97.4 and 97.2 percent of children under age 5, respectively
- infants receiving breast milk, and not receiving any other fluids or foods, with the exception of oral rehydration solution, vitamins, mineral supplements and medicines
- iv Infants receiving breast milk and certain fluids (water and water-based drinks, fruit juice, ritual fluids, oral rehydration solution, drops, vitamins, minerals, and medicines), but do not receive anything else (in particular, non-human milk and food-based fluids)
- v Infants age 0-5 months who are exclusively breastfed, and children age 6-23 months who are breastfed and ate solid, semisolid or soft foods
- vi Breastfeeding children: Solid, semi-solid, or soft foods, two times for infants age 6-8 months, and three times for children 9-23 months; Non-breastfeeding children: Solid, semi-solid, or soft foods, or milk feeds, four times for children age 6-23 months
- vii The indicator is based on consumption of any amount of food from at least 4 out of the 7 following food groups: 1) grains, roots and tubers, 2) legumes and nuts, 3) dairy products (milk, yogurt, cheese), 4) flesh foods (meat, fish, poultry and liver/organ meats), 5) eggs, 6) vitamin-A rich fruits and vegetables, and 7) other fruits and vegetables
- viii Full vaccination includes the following: BCG, Polio3, PENTA3, and Measles-1 (MCV1) as per the vaccination schedule in Punjab
- ix Education indicators, wherever applicable, are based on information on reported school attendance (at any time during the school year), as a proxy for enrolment.
- * Children involved in child labour are defined as children involved in economic activities at or above the age-specific thresholds, children involved in household chores at or above the age-specific thresholds, and children involved in hazardous work
- xi Using condoms and limiting sex to one faithful, uninfected partner
- xii The two most common misconceptions about HIV transmission are included in the indicator calculation: i) Supernatural means and ii) Mosquito bites
- xiii Transmission during pregnancy, during delivery, and by breastfeeding-
- xiv People (1) who think that a female teacher who is HIV-positive and is not sick should be allowed to continue teaching, (2) who would buy fresh vegetables from a shopkeeper or vendor who is HIV-positive, (3) who would not want to keep secret that a family member is HIV-positive, and (4) who would be willing to care for a family member with AIDS in own home
