OVERVIEW

Roads are predominant mode of transport in the country carrying more than 90 % of the passengers and freight traffic with an average growth rate of 4.5% and 10.5% respectively. The road network in Punjab is expected to cover over 80,000 km by the end of 2009. Increasing trends of road network expansion in the province owe largely to increases in traffic population densities. Estimated value of road assets in the province exceeds Rs.200 billion. In recent years overall demand for road transport has grown at 7 to 8 percent per year which surpasses average GDP growth rates by significant margins. Ever-mounting demands prevail for expansion of additional road links in the province to cope with existing gaps in road densities in both north and south zones of the province. MTDF (2009-12) aims to enhance existing road densities through rehabilitation, improvement, widening and construction of road network. Planning approach and emphasis in current year's development program, however, is focused on consolidation of existing road assets allowing for a gradual and systematic drawdown of the prevalent colossal throw-forward in the sector.

VISION

The vision for Punjab's road sector aims at upgrading, augmenting and maintaining a modern road network in the province under most cost-effective, optimal and efficient development and management regimes.

KEY STRATEGIES FOR DEVELOPMENT

Sectoral priorities identified for Punjab's road sector in the MTDF (2009-10 to 2011-12) are as follows:-

- Preparing an Asset Management Plan for the provincial road sector and undertaking planned rehabilitation of roads that have outlived their design life.
- Constructing missing road links.

- Developing province-wide secondary arteries (covering north-south and east-west corridors) linking national motorways / trade corridors to foster economic opportunities via meeting expanding domestic and international travel and trade demands.
- Improving average road densities to achieve optimal traffic density levels in consonance with increasing transportation requirements and targeted economic growth in the province.
- Implementing initiatives to improve road safety and axle-load conditions to achieve substantial reduction in road accidents and avert premature road distress.
- Undertaking widening / improvement of existing roads to 20' / 24' width for roads with traffic densities exceeding 800 VPD, targeting to achieve full coverage by year 2011-12.
- Dualization of main arteries with 8,000 VPD by the year 2015.
- Improvement of the geometry of existing roads and removal of black spots.
- Undertaking improvements in road design and specifications.

SALIENT FEATURES OF MTDF (2009-10)

Road sector's total outlay for the year 2009-10 is Rs.25.00 Billion, registering an increase of 28.2% over the sector's allocations in last year and accounting for 19% of the core development program for the fiscal year 2009-10. Projected allocations for the sector over medium term i.e. for years 2010-11 and 2011-12 are Rs.39.86 Billion and Rs.32.41 billion respectively. Keeping in view relatively low road densities in the southern and western regions of the province, the road sector development outlay under MTDF 2009-10 predominantly aims at expansion of roads and bridges in these areas in view of the existing gaps in road network coverage.

MTDF 2009-10 TARGETS

Out of total 1073 schemes in the road sector, 906 schemes have been fully funded to achieve consolidation and upgrading of existing network through undertaking widening and improvement of about 550 km length of existing roads from the present pavement widths of 10' or 12' to the enhanced road widths of 20' or 24'. In addition to above, construction of 250 Km new roads is also provided for in MTDF 2009-10 to cater for either missing links or augmenting present road network with additional corridors for economic, social and poverty alleviation considerations.

Description	FY 2008-09		FY 2009-10
	Targets	Achievements	Targets
Widening / Improvement of existing 10' / 12' to 20' to 24' wide road length	700 Km	470 Km	550 Km
New Construction	83 Km	62 Km	250 Km
